

## Your Hands Can Be More Powerful Tools Than You Can Imagine When Used Properly.

Each of us have different physical characteristics which make up who we are. It would be nice to wake up and have NO aches or pains, but as we all get older, this becomes more the rule than the exception.

So what can you do to counteract these signs of aging? Well, you can exercise several times a week, eat a healthy diet, don't smoke, but you already know that. But sometimes you also need some direction or guidance to get you back on the right path. The person that should be at the top of your list would be **Dr. Sean Felton of Hammond Chiropractic.**

Golfers sometimes have to yell "Fore" to warn others of impending danger. Last week Sean told us of his "fours" – he has been a Prospector for over four years, and has now been with Hammond Chiro for just over 4 weeks. Four- tuitous.

There are many preconceived notions about Chiropractic Medicine. Last week Sean tried to stop several of the notions by using a live demonstration of exactly what he does during a visit to his office.

We all know that there is much more that happens than what he showed, but having a volunteer (thanks to Rich Sirna) with several apparent issues, Sean was able to let us into his world as he evaluated Rich's physical challenges.

Sean's main purpose is to help bring relief to your body, your nervous system, and even your spirit. He does this by beginning with your lower extremities (feet, legs), looking to see if one is longer than the other. He made some minor adjustments, then moved onto the hips and lower back. After checking for tension and soreness, he moved onto the upper spine and neck, and eventually the arms.

## Your Hands Can Be More Powerful Tools Than You Can Imagine When Used Properly.

*Cont'd from Page 1 –*

He performed this cursory exam on a knee high portable adjustment table that he carried in from the car. What came to light as we listened to him explain the procedure is that his true purpose is to get them back in alignment and balance. And to bring relief to someone's pain or muscular discomfort removing any interference the body might have, and all without inflicting much force at all.

Sean's formula does not employ the old "cracking" of joints that we associate with chiropractic. He tries to increase your range of motion. That is why stretching is so important. If he can establish a more normal range of motion, then he has done his job.

It was great to actually see what goes into making you feel better and live better and know that it will make you a better physical specimen because of having been through it.

Thank You Sean for taking the time to inform and educate us on the world of health and physical well-being. If you want to learn more about how chiropractic might be beneficial to you, give Sean a call and let him show you more.

About the Presenter:

**Christopher F.  
Pickering,**  
*The Pickering  
Law Firm, P.A.*

Chris helps businesses and business owners protect their livelihood. He is involved in business planning, business transitions and business startups for small- to medium-sized businesses.

For over thirty years, Chris has regularly represented businesses, owners and principals in controversies, including shareholder disputes, non-competition disputes, and contract disputes. This perspective allows him to plan for what should be the three most important aspects of your business—how do you get in, how do you get out, and how do you get paid.

Chris has also worked closely with banks like Bank Midwest to make sure that the clients have the financial support and advice necessary to start, grow, and continue their successful businesses.
